Notes On Elements

The purpose of this document is to list and describe the elements and attributes of a complete XML document that describes a Form 1 2012. The document aims to identify all the necessary validation rules that are required to enable a successful upload of the generated Form 1 2012 XML document onto ROS.

Validation

Validation rules are presented throughout the document specific to their associated attributes.

Text input fields will only accept values from the character set that is provided in Appendix 1.

Where Whole and Decimal numbers are entered on the form, these values must conform to the requirements set out in Appendix 1.

Internal Elements

There are a number of sub elements in the Form1 element that are for internal processing only and are not input on the form.

They are:

- RequestShortNoa
- OtherCodes
- Note
- SummaryCalculation

Mini Calculations

There are 5 mini-calculations throughout the Form 1. Further explanation of these can be found in Appendix 2.

Appendix 1

Standard Text Characters

The users of the Form 1 may use a wide range of systems, and some of these systems allow non-latin characters to be entered into the text boxes of the Form 1 (e.g. Chinese, Hebrew, Arabic and Cyrillic characters).

Although the screens cannot physically prevent users from inputting these characters, the characters can be rejected by a validation rule.

All text fields on the form will have a validation rule that will allow only the following characters.

Text Characters Accepted On The Form 1

A b c d e f g h i j k l m n o p q r s t u v w x y z
A B C D E F G H I J K L M N O P Q R S T U V W X Y Z
0 1 2 3 4 5 6 7 8 9
á à â ã ä å é ê ë ì í î ï ó ò ô õ ö ù ú û ü ÿ æ ø ç
Á Â Ã Ä Å Æ È É Ê Ë Ì Í Î Ï Ó Ô Õ Ö Ù Ú Û Ü Ý Æ Æ Ø Ç
ß f
£ \$ € % & * _ - + = { } [] () < > : ; , . “ ’ @ ~ # ¡ ? ! ; / \

(space character)
(line-break)

Whole Number

Many fields on the Form 1 require a ‘whole number’ to be entered. For the purposes of the screens, a whole number must be positive and made up entirely of the digits 0 – 9. Additional characters, e.g. commas used to separate thousands, are not permitted.

Decimal Number

Several fields on the Form 1 require a ‘decimal number’ to be entered. For the purposes of the screens, a decimal number must be positive and made up entirely of the digits 0 – 9, with a single decimal ‘dot’ allowed. Additional characters, e.g. commas used to separate thousands, are not permitted.

Appendix 2

Introduction

This section lists the five calculations, the results of which must be used when each corresponding attribute is provided in the XML. Each calculation lists the rules that should be used to generate the value provided for the attribute within the xml.

Mini-Calculation - Irish Untaxed Income

The total Irish untaxed income is calculated as follows:

```
Total Irish Untaxed Income (F39) =  
    Irish Government Stocks (F35)  
    + Irish Exchequer Bills (F36)  
    + Irish Credit Union Dividends (F37)  
    + Other Loans and Investments arising in the State (F38)
```

Mini-Calculation - Rental Expenses

The net rental income field is calculated as follows:

```
Net Rental Income (F63) =  
    Gross Rent Receivable (F58) -  
    [    Repairs Expenses (F59)  
      + Interest Expenses (F60)  
      + Section 23 Relief (F61)  
      + Other Expenses (F62) ]
```

The net rental income figure cannot be negative, so if the calculation above results in a negative number, the field is populated with '0'.

Mini-Calculation - Foreign Rents

The foreign rents profit field is calculated as follows:

```
Foreign Rents Profit (F84) =  
    Foreign Rents Income (F82) - Foreign Rents Expenses (F83)
```

The profit figure cannot be negative, so if the calculation above results in a negative number, the field is populated with '0'.

Mini-Calculation - Undistributed Surcharge

The first calculation is carried out as follows.

```
Deductions Multiplied By 100/80 (F194) =  
    [ Allowable Trust Expenses (F192) + Distributions (F193) ]  
    x [ 100 / 80 ]
```

The result of the calculation is rounded up to the next whole Euro amount, and is capped at €9,999,999,999.

The second calculation is carried out as follows:

```
Undistributed Income (F195) =  
    Trust Income (F191) - Deductions Multiplied By 100/80  
    (F194)
```

The undistributed income figure cannot be negative, so if the result of the calculation above is negative, the field is populated with '0'.

The third calculation is carried out as follows:

```
Surcharge (F196) =  
Undistributed Income (F195) x [ 20 / 100 ]
```

The result of the calculation is rounded down to the next whole Euro amount.

Mini-Calculation - Total Consideration On Disposals

The *Total Consideration On Disposals* field is calculated as follows:

```
Total Consideration On Disposals (F229) =  
    Consideration On Shares/Securities - Quoted (F209)  
+ Consideration On Shares/Securities - Unquoted (F210)  
+ Consideration On Agricultural Land / Buildings (F213)  
+ Consideration On Development Land (F216)  
+ Consideration On Foreign Life Policies (F218)  
+ Consideration On Offshore Funds (F220)  
+ Consideration On Commercial Premises (F222)  
+ Consideration On Residential Premises (F224)  
+ Consideration On Shares or Securities Exchanged (F226)  
+ Consideration On Other Assets (F228)
```

The result of the calculation is capped at €999,999,999.
